

Clermont Risk Communication Discussion Seminars

Maison Internationale
9 rue Kessler, Clermont-Ferrand (63)

April 3 – 4 2018

Challenge 4 de CAP 20-25 « Risques naturels »

The objective of this meeting is to discuss the links between risk, communication and society in volcanic environments.

Contact: ben.vanwyk@uca.fr

The aim is:

- To bring to Clermont-Ferrand major international actors in areas of natural risk (both geographic and subject areas) identified for the Challenge 4 of the Clermont I-Site.
- To further international cooperation to opening up the Challenge 4 initiative.

The discussion should act as a stimulus for trans-disciplinary cooperation in and outside the Clermont site, especially to bring the actors from humanities and social sciences closer to those from the natural sciences.

All UCA personnel from all disciplines are invited to the discussions that will be held at Maison Internationale, 9 rue Kessler, Tue. 3rd April and Wed. 4th April 2018.
